MULTICHANNEL PAYMENT SINGLE VIEW

Unified Collections Gateway

The ultimate payment aggregation platform for revenue assurance

CICOD Unified Collections Gateway (UCG) application enables the real-time aggregation of collections for different payment channels without leakages, all under one system. CICOD UCG is ideal for any business collecting revenue from multiple channels. The application features a reports dashboard that includes all information on the various transactions for both pre-pay and post-pay customers occurring on different channels. Integration of all payment channels to UCG will ensure transparency on collections, provide visibility on collection leakages and monitor actions taken to recover customer debts and provides financial audit transaction trail.

BENEFITS OF UNIFIED COLLECTIONS GATEWAY

Revenue Collection Transparency

UCG displays details of real-time transactions in clear terms, easy to understand details and reconciliation of the inflow of revenue.

Payment Channels Integration

UCG seamlessly integrates with any payment channel responsible for collections and enables easy pull for data on payment collections.

Detailed Transaction Reporting

UCG has detailed and comprehensive transaction reports capability to understand any transactions in-depth. Order IDs (unique identifiers for each transaction) enables tracking and identification of transactions. This makes the reconciliation process faster and easier.
